

December 1997

Image shows 4 blocks sewn together to create a 'star' design.

*please refer to pattern in newsletter*

4" block (4 ½ " unfinished)

To make 4 squares:

Cut four 5 ½ squares, one dark red print, one dark green print, and two ivory/tone-on-tone

Stack the squares with wrong sides facing up, and measure 1 ¾ " from each corner (in a clockwise direction) and cut as indicated.

The most confusing thing about making this block is which sides of the odd-shaped pieces to sew together, because it "doesn't look right".

However, if you lay out the pieces before you sew, it will be more obvious what goes where!

[Click here to see layout](#), Fabric is wrong side up

Starting from the centre, join sides *a* and *b*, sewing a light to a dark.

Press seams toward the darker fabric.

Matching the centre seam, join each red/ivory pair to a green/ivory pair to form a square.

No, the edges will not be even! So after pressing, carefully centre and trim to measure 4 ½ " (unfinished measurement).
