

"Bear Paw"

"12 block
(12 1/2" unfinished)

Instructions

Fabric Needed

- A. Cut 4 - 2 1/8" Squares white/white
- B. Cut 8 - 3" Squares white/white Cut 8 - 3" Squares green
- C. Cut 4 - 3 3/4" Squares Green
- D. Cut 4 - 2 3/4" x 5 3/8" Rectangles of white/white
- E. Cut 1 - 2 3/4" Square green

Method 1

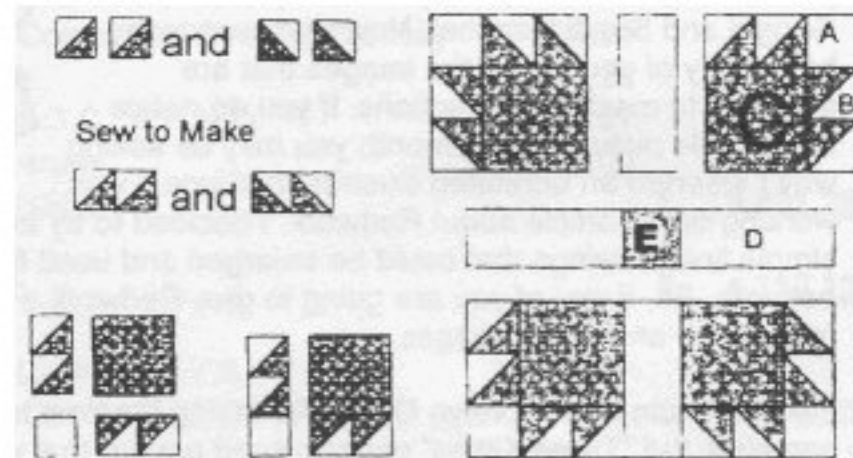

If your 1/4" seam isn't very accurate cut your squares 7/8" larger than the size of the square you need. Place right sides together. Mark a diagonal line on the back of the lightest square. Sew a 1/4" seam on both sides of the diagonal line and cut along the diagonal line. Press towards dark and then use a ruler to cut to size. (I use the bias square ruler) This way your half square triangles are accurate.

Method 2

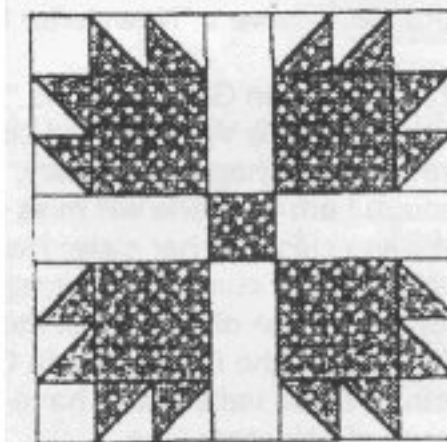

You can make them simply by cutting your square of fabric 1/2" larger than the size of the square you need. Cut on the diagonal and sew. You need to have a very accurate seam for this method.

Construction Sew in order: see diagrams
